

Corporate Value: Business that will create 5 million jobs

The Company working towards Sustainable Development Goals (SDGs)

Global Gates Co., Ltd.
Hotel Housekeeping Management

Introduction

In May 2007, Global Gates Co., Ltd. was founded in Fukuoka City as a general trading company specializing in human and environment-friendly products. In 2008, we were the first in Japan to develop LED fluorescent lighting fixtures and manufacture them at our overseas factory. We have established a nationwide wholesale network and delivered the products to the major railroad companies in Japan. Since its establishment, we have consistently responded to our customers' needs by planning, developing and proposing new products such as "industrial electronic whiteboard", "magnetic water activator that cleans water", "energy-saving air conditioning filters that require no installation work", "unscented anti-bacterial deodorizer", and "scale-proof mirror". Currently, we not only wholesale products specifically for the hotel industry, but also work for hotel housekeeping management and facility management. We are here to help each accommodation facility to differentiate itself from its competitors and to maintain the quality of its cleaning service. Please feel free to contact us for more information.

Masayuki Umemura, Founder of Global Gates, Co., Ltd

Masayuki Umemura

President & CEO of Global Gates Co., Ltd. (55 years old)

Worked for JALPAK (JAL Group), New York Office, U.S.A.

[illegible]

Business Unit

- Fingerprint vein authentication time-cards
- New employee trainings with remote glasses, etc.

In addition, eliminated paper pay slips and preparing to shift to electronic payment.

Achieved optimization with our original shift schedule management system using AI

Business Unit

In order to realize a wide variety of working styles, AI has been introduced to adjust the number of cleaning staff and increase the performance of their work.

Built a video production studio "G100 Station" in the company

Business Unit

Make videos about all the information inside and outside of the company.

PR + Human Resources Department (recruiting, internal newsletters) + Sales and Marketing of products
= "Video Production"

As a result, the sales department run by human was closed and the PR, HR, and Internal Production Departments were integrated.

Managing Effective Use of Big Data

"Ozma" on a daily basis.

Unitary management of information data with AI.

- Sharing information regarding complaints
- Sharing and storing information on the local hourly wages, hotel occupancy rates, climate, culture and customs in each area, and clean-up techniques at hotels, etc.

Facility Management Division

Hasper

ROGO

Hasper

Our new robot employee
“Hasper”

24 years old employee from Fukuoka.
Joined the company in 2019.

We are part of the hotel staff

Our work is not visible to our guests, but we fully express our hospitality.
We pursue continuous studies in various fields to provide "essential work" required in the society.

We provide an atmosphere that makes our hotel guests feel comfortable

Anti-Bacterial COPPER GG MASK (Daily goods)

This copper mask uses a new functional copper material that protects your skin and helps you breathe in a healthy manner. It blocks harmful dust with its microfabricated multilayer structure design and has a strong antibacterial effect against harmful respiratory viruses, bacteria, and allergens. It is comfortable to wear and stylish in design.

Patented eco-technology microfabricated multilayer structure design and antibacterial mask.

New material: copper nano powder, polyester, nylon, and polyurethane synthetic fibers

Features

- Excellent in removal of bad breath, eliminates 90% of odor after 120 minutes
- Eliminates 99% of harmful bacteria at the time of contact
- V-line three-dimensional design with highly stretchable and lightweight material
- Ecologically produced with Green Technology and is Green Certified Product
- Three-Dimensional nose pad to block contaminants
- 0.3 micron fine particles 90% blocking filter
- Three-layered filtering system for blocking harmful substance
- UV blocking

Precautions for use

- Be sure to handwash with neutral detergent.
- Recommended to wash with hot water of 30 degrees or higher.
- Do not twist the fabric when washing.
- The mask material includes copper-nano powder having antibacterial effect. Therefore, the mask does not need to be washed every day. If you hang it where there is fresh air it only needs to be washed once every two days. When drying, please avoid sunlight as much as possible.
